

**Training Program To Prepare
'TREATMENT PRODUCT TRAINING'**

DESCRIPTION OF THE TRAINING

Treatment products training programs are training for more specialized/treatment products. This is a great way to get- started a profitable business on more serious note. This may be for your beauty parlor or saloon or your new industry. Treatment products empower you to provide best treatments and product recommendation for even more stubborn skin concerns. These products are performed to improve and correct a structural defect (pigmentation) or to remove a scar /acne of the skin. Participants of these training programs will have practical experience with their own hands.

The making of cosmetics is as simple as making food. You don't need Food Science degree to make food & hence you don't need degree in Chemistry to make cosmetics. The formulas which will be shared in the training program are 'Commercially Proven' Marketable industrial formulas & not just Internet recipes which may or may not work.

Participants will receive a wealth of important information on the basic raw materials that are used. In addition to the information published in this pack, InMc instructors will share several 'insider-secrets' that are not published in any of the InMc literature.

Total no. Of Treatment products available for Training: 75
